

## Studies on the Impact of COVID-19 in Jordan

A range of different studies were conducted by local and international entities to analyze the impact of COVID-19 on various sectors and thematic areas in Jordan. These studies research the implications of the virus and the subsequent lockdown on individuals, businesses, and the economy with a focus on health and wellbeing, in addition to behavioral change. These reports serve as a reference to understand the ramifications of the crisis on Jordan and offers valuable information that increases the preparedness in responding to similar crises more efficiently in the future, leaving no one behind. More importantly, these studies serve as a lesson to the entirety of the financial sector on the evolution and development of the needs of various sectors in Jordan in light of the COVID-19 crisis. In learning and understanding the outlook of the various sectors across the Jordanian economy, we aim towards a more adaptive, intuitive, and robust financial and banking sectors, not only capable of supporting various economic activities through crises, but also anticipating the economic and financial needs that would lead us towards a healthy and sustainable Jordanian economy.
